

AMENDMENTS TO THE ABSTRACT

Beginning on page 13, please amend the abstract as follows:

B'
Collimation device of the type intended to direct an energy beam in a given direction and at a given solid angle, the collimation device being capable of being installed on output of an energy beam generating ~~means~~ arrangement and of being connected to a control unit. The collimation device includes ~~means~~ the ability for testing operation of the assembly formed by the energy beam generating ~~means~~ arrangement, the collimation device [[1]] and the control unit.
